Chemistry and Physics of Lipids, 44 (1987) 363
Elsevier Scientific Publishers Ireland Ltd.

SUBJECT INDEX

Volume 44 (1987)

Aging, lipofuscin, lipofuscin-like substances, fluorescence, vitamin E deficiency, in vivo lipid peroxidation, 297
Ascorbate-glutathione cycle, chloroplast, lipid peroxidation, superoxide, ascorbic acid, glutathione, singlet oxygen, carotenoids, malondialdehyde, TBA test, 327.
Ascorbic acid, chloroplast, lipid peroxidation superoxide, glutathione, singlet oxygen, carotenoids, ascorbate-glutathione cycle, malondialdehyde, TBA test, 327
Autoxidation, cholesterol, oxysterols, 87
Autoxidation, photosensitized oxidation, singlet oxygen, hydroperoxides, endoperoxides, cancer, DNA, 73

Biological membranes, lipid peroxidation, membrane order, membrane "viscosity", lipid mobility, protein mobility, 175

Calorimetry, dipalmitoylphosphatidylcholine, dihexadecylphosphatidylcholine, mixing behaviour, X-ray diffraction, 61
Calorimetry, ether phospholipids, phase diagram, X-ray diffraction, specific volumes, 31
Cancer, autoxidation, photosensitized oxidation, singlet oxygen, hydroperoxides, endoperoxides, DNA, 73
Carbon tetrachloride, lipid peroxidation, oxygen partial pressure, cell injury, iron, liver, 209
Carotenoids, chloroplast, lipid peroxidation, superoxide, ascorbic acid, glutathione, singlet oxygen, ascorbate-glutathione cycle, malondialdehyde, TBA test, 327
Cell injury, lipid peroxidation, oxygen partial pressure, iron, carbon tetrachloride, liver, 209
Chloroplast, lipid peroxidation, superoxide, ascorbic acid, glutathione, singlet oxygen, carotenoids, ascorbate-glutathione cycle, malondialdehyde, TBA test, 327
Cholesterol, autoxidation, oxysterols, 87
Critical micellar concentrations of detergents, lipid probe, fluorescent probe, 19
Cross-link, protein, fluorescence, lipid hydroperoxides, malonaldehyde, monofunctional aldehydes, 277

Dihexadecylphosphatidylcholine, dipalmitoylphosphatidylcholine, mixing behaviour, X-ray diffraction, calorimetry, 61
Dipalmitoylphosphatidylcholine, dihexadecylphosphatidylcholine, mixing behaviour, X-ray diffraction, calorimetry, 61
DNA, autoxidation, photosensitized oxidation, singlet oxygen, hydroperoxides, endoperoxides, cancer, 73

Eicosanoids, glutathione, glutathione peroxidase, lipid peroxidation, phospholipid hydroperoxide glutathione peroxidase, selenium, vitamin E, 255
Electron spin resonance, radicals, peroxidation, spin traps, 149
Endoperoxides, autoxidation, photosensitized oxidation, singlet oxygen, hydroperoxides, cancer, DNA, 73
Epoxidation, peroxyl radical, peroxidase, metabolic activation, polycyclic aromatic hydrocarbon, 127
Ether phospholipids, phase diagram, X-ray diffraction, calorimetry, specific volumes, 31

Fluorescence, lipofuscin, lipofuscin-like substances, aging, vitamin E deficiency, in vivo lipid peroxidation, 297
Fluorescence, protein, cross-link, lipid hydroperoxides, malonaldehyde, monofunctional aldehydes, 277

Fluorescent probe, lipid probe, critical micellar concentrations of detergents, 19

Glutathione, chloroplast, lipid peroxidation, superoxide, ascorbic acid, singlet oxygen, carotenoids, ascorbate-glutathione cycle, malondialdehyde, TBA test, 327
Glutathione, glutathione peroxidase, lipid peroxidation, phospholipid hydroperoxide glutathione peroxidase, selenium, vitamin E, eicosanoids, 255
Glutathione peroxidase, glutathione, lipid peroxidation, phospholipid hydroperoxide glutathione peroxidase, selenium, vitamin E, eicosanoids, 255

Hemolysis, peroxidation, oxygen radicals, liposomes, hemolysis, antioxidant, vitamin C, uric acid, vitamin E, 227
Hydroperoxide, leaf alcohol, leaf aldehyde, linolenic acid, tea chloroplast lipoxygenase, hydroperoxide lysase, 341
Hydroperoxide lyase, leaf alcohol, leaf aldehyde, linolenic acid, tea chloroplast lipoxygenase, hydroperoxide, 341
Hydroperoxides, autoxidation, photosensitized oxidation, singlet oxygen, endoperoxides, cancer, DNA 73

In vivo lipid peroxidation, lipofuscin, lipofuscin-like substances, fluorescence, aging, vitamin E deficiency, 297
Iron, lipid peroxidation, oxygen partial pressure, cell injury, carbon tetrachloride, liver, 209
Iron (II) oxidation, iron (III) reduction, lipid peroxidation, 191
Iron (III) reduction, iron (II) oxidation, lipid peroxidation, 191

Leaf alcohol, leaf aldehyde, linolenic acid, tea chloroplast lipoxygenase, hydroperoxide, hydroperoxide lyase, 341
Linolenic acid, leaf alcohol, leaf aldehyde, tea chloroplast lipoxygenase, hydroperoxide, hydroperoxide lyase, 341
Lipid hydroperoxides, protein, fluorescence, cross-link, malonaldehyde, monofunctional aldehydes, 277
Lipid mobility, biological membranes, lipid peroxidation, membrane order, membrane "viscosity", protein mobility, 175
Lipid peroxidation, biological membranes, membrane order, membrane "viscosity", lipid mobility, protein mobility, 175
Lipid peroxidation, chloropast, superoxide, ascorbic acid, glutathione, singlet oxygen, carotenoids, ascorbate-glutathione cycle, malondialdehyde, TBA test, 327
Lipid peroxidation, glutathione, glutathione peroxidase, phospholipid hydroperoxide glutathione peroxidase, selenium, vitamin E, eicosanoids, 255
Lipid peroxidation, iron (III) reduction, iron (II) oxidation, 191
Lipid peroxidation, oxygen partial pressure, cell injury, iron, carbon tetrachloroide, liver, 209
Lipid probe, fluorescent probe, critical micellar concentrations of detergents, 19
Lipofuscin-like substances, lipofuscin, fluorescence, aging, vitamin E deficiency, in vivo lipid peroxidation, 297
Liposomes, peroxidation, oxygen radicals, hemolysis, antioxidant, vitamin C, uric acid, vitamin E, 227
Liver, lipid peroxidation, oxygen partial pressure, cell injury, iron, carbon tetrachloride, 209

Malondialdehyde, chloroplast, lipid peroxidation, superoxide, ascorbic acid, glutathione, singlet oxygen, carotenoids, ascorbate-glutathione cycle, TBA test, 327
Malonaldehyde, protein, fluorescence, cross-link, lipid hydroperoxides, monofunctional aldehydes, 277
Membrane order, biological membranes, lipid peroxidation, membrane "viscosity", lipid mobility, protein mobility, 175
Membrane "viscosity", biological membranes, lipid peroxidation, membrane order, lipid mobility, protein mobility, 175
Metabolic activation, peroxyl radical, peroxidase, epoxidation, polycyclic aromatic hydrocarbon, 127
Mixing behaviour, dipalmitoylposphatidyl-

choline, dihexadecylphosphatidylcholine, X-ray diffraction, calorimetry, 61
Monofunctional aldehydes, protein, fluorescence, cross-link, lipid hydroperoxides, malonaldehyde, 277

Oxygen, partial pressure, lipid peroxidation, cell injury, iron, carbon tetrachloride, liver, 209
Oxygen radicals, peroxidation, hemolysis, antioxidant, liposomes, vitamin C, uric acid, vitamin E, 227
Oxysterols, cholesterol, autoxidation, 87

Peroxidase, peroxyl radical, metabolic activation, epoxidation, polycyclic aromatic hydrocarbon, 127
Peroxidation, oxygen radicals, liposomes, hemolysis, antioxidant, vitamin C, uric acid, vitamin E, 227
Peroxidation, radicals, electron spin resonance, spin traps, 149
Peroxyl radical, peroxidase, metabolic activation, epoxidation, polycyclic aromatic hydrocarbon, 127
Phase diagram, ether phospholipids, X-ray diffraction, calorimetry, specific volumes, 31
Phospholipid hydroperoxide glutathione peroxidase, glutathione, glutathione peroxidase, lipid peroxidation, selenium, vitamin E, eicosanoids, 255
Photosensitized oxidation, autoxidation, singlet oxygen, hydroperoxides, endoperoxides, cancer, DNA, 73
Polycyclic aromatic hydrocarbon, peroxyl radical, peroxidase, metabolic activation, epoxidation, 127
Protein, fluorescence, cross-link, lipid hydroperoxides, malonaldehyde, monofunctional aldehydes, 277
Protein mobility, biological membranes, lipid peroxidation, membrane order, membrane "viscosity", lipid mobility, 175

Radicals, electron spin resonance, peroxidation, spin traps, 149
Respiratory distress syndrome, synthetic lung surfactants, surfactant apoprotein, 1

Selenium, glutathione, glutathione peroxidase, lipid peroxidation, hydroperoxide glutathione peroxidase, vitamin E, eicosanoids, 255
Singlet oxygen, autoxidation, photosensitized oxidation, hydroperoxides, endoperoxides, cancer, DNA, 73
Singlet oxygen, chloroplast, lipid peroxidation, superoxide, ascorbic acid, glutathione, carotenoids, ascorbate-glutathione cycle, malondialdehyde, TBA test, 327
Specific volumes, ether phospholipids, phase diagram, X-ray diffraction, calorimetry, 31
Spin-traps, radicals, electron spin resonance, peroxidation, 149
Superoxide, chloroplast, lipid peroxidation, ascorbic acid, glutathione, singlet oxygen, carotenoids, ascorbate-glutathione cycle, malondialdehyde, TBA test, 327
Surfactant apoprotein, synthetic lung surfactants, respiratory distress syndrome, 1
Synthetic lung surfactants, respiratory distress syndrome, surfactant apoprotein, 1

TBA test, chloroplast, lipid peroxidation, superoxide, ascorbic acid, glutathione, singlet oxygen, carotenoids, ascorbate-glutathione cycle, malondialdehyde, 327
Tea chloroplast lipoxygenase, leaf alcohol, leaf aldehyde, linolenic acid, hydroperoxide, hydroperoxide lyase, 341

Vitamin E deficiency, lipofuscin, lipofuscin-like substances, fluorescence, aging, in vivo lipid peroxidation, 297
Vitamin E, glutathione, glutathione peroxidase, lipid peroxidation, phospholipid hydroperoxide glutathione peroxidase, selenium, eicosanoids, 255

X-ray diffraction, dipalmitoylphosphatidylcholine, dihexadecylphosphatidylcholine, mixing behaviour, calorimetry, 61
X-ray diffraction, ether phospholipids, phase diagram, calorimetry, specific volumes, 31

Chemistry and Physics of Lipids, 44 (1987) 367
